

MBO profile

We specialize in: **Road engineering** (roads, parking lots, service roads, forest roads), **Hydro-engineering** (drainage works, sewage systems, reinforcements, excavations, river engineering), **pavement works** (squares, roads, parking lots) - within the range of repair and new investment works.

History

Our company was established in 1988, and it functions continuously, realizing construction works. We were transformed from the state-owned building company Transbud. We have been gaining experience for 20 years of our presence on the construction market.

Cooperation:

During execution of works we cooperate often with local companies. When realizing works that require e.g. geological test, project solutions, expert's opinion etc., we cooperate with Civil Engineering Institutes of the Technical University in Krakow or other. When undertaking difficult projects that require special construction equipment we cooperate with the biggest companies (Budostal-8, Mostostal, ZTE Radom, ZTS Bielsko-Biała and Katowice).

We are in disposal of qualified personnel with skilled technical and engineering supervisors.

Standards

Our projects are carried out to national and obligatory technical standards, we draw up the estimation according to valid or internal standards, after former agreement with the party ordering.

Settlement is made basing on the basis of the quantity survey, delivery acceptance act or after work estimate. With executed works, we provide a minimum 36-month guarantee.
